Sitrin CEO Richard Wilson is joined by Board Chairman Edward Kowalsky, residents and their families, benefactors, board members, employees, and state, local, and federal officials to celebrate the completion of phases I and II of Sitrin's expansion project. Phase three of the project includes renovations for Sitrin's inpatient medical rehabilitation unit. This area will include 46 larger, private rooms and bathrooms, meeting patient demand for more privacy and convenience. Renovations are expected to be complete by the fall of 2009.
