

# EXPANSION *Updates*

MAY 2009

## Long-Term Care Houses

▲ Trees have arrived and planting can now begin! When residents look out of the large picture windows, they will enjoy the beautiful view.

◀ The spa room in each long-term care house will feature a hair stylist's sink, so residents will have the opportunity to get their hair cut and styled right in their own home.

◀ Appliances have arrived and are being installed in the kitchens of many of the long-term care houses! In addition to a refrigerator, freezer, stove, and dishwasher, the kitchens will also have a large coffee maker.

▲ The community building is the centerpiece of the long-term care campus. This large spacious room can be used for gatherings and special events. The area can also be separated to host two different events at one time.

▲ Seeds have been spread for the lawns of the long-term care houses. Before long, residents will be able to enjoy the thick, green grass.

The community building features a large kitchen, which can be used by staff during breaks.
