

SPEECH-LANGUAGE PATHOLOGY SERVICES

SITRIN

The Help. The Hope. The Healing.

Pediatric & Adult Language Evaluation and Therapy, and Articulation and Motor-Speech Evaluations and Therapy

At Sitrin, speech-language pathologists perform case-specific evaluations, and develop individualized therapy programs. They work with patients and their families to assist in restoring and improving communication abilities. Sitrin provides a variety of specialized services for adults and children including:

Pediatric & Adult Diagnostic Voice Evaluation and Therapy

Evaluation of impaired voice followed by treatment targeting improvement of structure/function and elimination of "bad vocal habits."

Language Learning Disability (LLD) Evaluations

Aimed at identifying strengths and weaknesses in students' language learning style in order to develop individualized language strategies.

Swallowing Evaluations and Therapy

Evaluation and treatment of chewing and swallowing with the goal of maximizing safety and enjoyment.

Augmentative Alternative Communication (AAC) Assessments

Evaluations for patients who have difficulty communicating verbally and may benefit from assistive technology.

Adult Cognitive Linguistic Evaluations and Therapy

Treatment for individuals with impaired cognition and memory in the interest of maximizing independence.

Sitrin's Speech-Language Pathologists treat a wide range of diagnoses including:

Auditory Processing Disorders
Apraxia of Speech
Autism Spectrum Disorders
Stroke
Vocal Fold Paralysis
Dysarthria (oral weakness)

Nodules/Polyps
Cerebral Palsy
Cleft Palate
Stuttering
Memory Deficits

Brain Injury
Parkinson's Disease
Developmental Delays

Patient and Family Education and Training

Sitrin speech-language pathologists provide education regarding communication impairment and home programs to better assist patients in improving and restoring communication abilities. Family members are considered a vital component of the rehabilitation process.
